PROFESSIONAL SUMMARY

Results-driven Software Developer with over 8 years of experience in front-end development, specializing in ReactJS and building feature-rich web applications. Proven ability to manage projects and contribute to the complete development lifecycle, from conception to deployment. Seeking to leverage expertise in creating top-of-the-line client-facing interactive systems with the right approach and skillset to drive business success.

PROFESSIONAL EXPERIENCE

Senior Software Developer

Devship | July 2021 – Present | Chennai, Tamil Nadu

- Led front-end development for a comprehensive CRM system, building an intuitive admin dashboard and client-facing features including training modules and e-commerce capabilities.
- Collaborated with cross-functional teams to define project requirements, manage timelines, and ensure the delivery of high-quality, scalable code.
- Built few other full-fledged web applications involving features like Inventory Management, E-Commerce and Financial Review.

Web Developer

Logistics Sector Skill Council | Nov 2018 – July 2021 | Chennai, Tamil Nadu

- Spearheaded end-to-end development and delivery of Learning Management System (LMS) websites, from requirement gathering to deployment and post-launch support.
- Curated and structured educational content to align with client requirements and user engagement goals.
- Collaborated directly with clients to analyze problems, propose solutions, and ensure satisfaction.
- Managed a cross-functional team, overseeing project timelines, task allocation, and quality assurance.

Product Manager

Ellipticals Networks | July 2018 – Oct 2018 | Bengaluru, Karnataka

- Directed the product delivery team to launch a real-money gaming app. Managed the monitoring of the game 24/7, the game master dashboard, curated the payouts enabling technical support.

Technical Lead

Evansys Technologies | May 2017 – June 2018 | Chennai, Tamil Nadu

- Developed and managed websites for clients from educational institutions starting from conception to deployment followed by post-launch support and maintenance.
